at&t

AT&T is an early adopter of HomeGrid Certified G.hn. Here is what they have to say about G.hn technology:

"I am up and running on G.hn using only power line connectivity for all my video. While in-depth analysis is still ongoing, it's running flawlessly - three cheers are in order. It is exactly what we are looking for in a "Plug and Play" network solution."

- Vernon Reed, Lead Member of Technical Staff, AT&T Labs
